yeah
just
think
client
REST
resource
like
see
way
mamund
mikekelly
state
use
need
type
right
know
really
server
clients
application
data
people
something
stuff
point
URI
HTTP
link
much
want
actually
mean
might
also
hypermedia
HTML
problem
sure
yes
well
media
good
one
work
make
things
used
interesting
around
sense
probably
service
types
guess
browser
rel
darrelmiller
etc
request
RDF
Still
URIs
semantics
POST
question
idea
go
possible
links
name
cache
machine
post
thinking
since
specific
header
nice
ok
now
pretty
change
caching
interface
query
talk
JSON
start
understand
model
send
list
back
last
add
wrong
update
always
though
going
anyone
read
never
new
example
time
response
different
maybe
user
app
thanks
makes
write
darrel
web
seems
better
representation
sorry
trying
get
using
kind
enough
simple
means
resources
two
true
webr3
GET
representations
already
LOL
another
whartung
code
content
form
anyway
part
apps
design
generic
seen
thought
system
PUT
bit
done
hmm
e.g
algermissen
protocol
give
oh
cool
thing
many
got
basically
looking
instead
agent
headers
rest
based
document
method
RESTful
saying
create
XML
API
call
body
long
help
needs
name
works
every
level
next
course
must
fine
side
order
